1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 8 (second occurrence) and 9 have been renumbered 9 and 10, respectively. Claims 1-3, 6, 7 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Reed. Reed discloses a boat hook and line handling device with a telescoping shaft 12, a clip 24 with an enlarged end, a hinge including pin 40, and a spring 44. Note that the clip forms a portion of an inner tube 16.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4, 5, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reed in view of Kolodziej (cited by Applicant). Reed does not disclose the bolted clamp. Kolodziej teaches a bolted clamp (note Figure 4, for example). It would have

been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Reed with a bolted clamp to have mechanical reliability, ease of use, and detachability from the handle for storage and low fabrication cost as taught by Kolodziej.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Collic, Sr. shows a hook. Stoliar et al shows a hook.

7. The specification, page 1, related applications, should be updated to show the parent application patent number.
